WATERMELON SEED

No. 4—Select melons for seed.

No. 5—Seed mill

No. 6—Eaton Boys, Big Pap, Bill and Joe.

Jefferson County, Florida, of which Monticello is the County seat is the home of the Watermelon seed industry of the United States, or in fact, the world, for this county grows more watermelons for seed purposes than any other section, and more watermelons are planted in North America than any other continent. The last report of the United States Department of Agriculture shows that the acreage in watermelons for seed purposes last year was 10,522 in the whole United States, and out of that number 8,543 acres were in Jefferson County, Florida, which is a little over 80% of all the watermelons grown for seed.

Watermelon seed grown in this county are sold in every State, and a good many exported to foreign countries. Seed from watermelons grown here will grow and do well in any section, for there is no place where they can be harvested and cured better, as the climate and soil are ideal for them.

No matter where you buy your watermelon seed, the chances are ten to one that they were grown on my Seed Farm in Jefferson County, Florida.

This is the only place in the world where you can buy watermelon seed by the carload. Forty years we have grown Watermelons exclusively for seed.

When considering our prices and comparing them with others, remember that the SEED we offer are not common stock, but FANCY SELECTED, and gathered from large melons only.

Our business is on the square, and we will refund your money if the SEED are not satisfactory. Poor seed are high, no matter how low the price, and Fancy Select SEED are cheap, no matter how the price.
